

Enira, Bulgaria

Count Stephan von Neipperg, owner of several famous Bordeaux properties, including Châteaux Canon La Gaffelière and La Mondotte, sought out the Bessa Valley where the wonderful clay-limestone soils showed him the potential to make great wines.

In the shadow of the dramatic Rhodope Mountains, these soils provide the structure, strength and minerality that allows Stephan to create wonderful wines that are full of power and elegance.

Viticulture

Bessa Valley is located on the hills between the Rhodope Mountains and Maritsa River. The climate is continental – hot summer and cold winter. The terroir is influenced by the river and the mountain. Rainfalls are at usual level. The soil in the Valley is loamy and clay-stony, mixed with limestone. The limestone rock is half a meter under the soil layer. 140 Hectares of vines are planted with Merlot, Syrah, Petit Verdot and Cabernet Sauvignon.

Highlights

- The Bessa Valley has a continental climate, with no influence from the Black Sea with the temperature moderated by strong cooling winds.
- The main cellar forms an arc which is dug into the hillside which provides natural temperature and humidity control for the maturation of the wines.
- Vines are supported only using acacia sticks.

Enira Their Wines >

Item	Vintage		Pack size (cl)
1354	2018	Enira, Bessa Valley, Bulgaria	6 x 75
1356	2018	Enira, Reserva, Bessa Valley, Bulgaria	6 x 75
